

1. Follow requirements of manufacturer, if supplied.
2. Unit shall be made of non-combustible material.
3. The unit is to completely contain/enclose the fire.
4. The unit is to be equipped with a spark arrester and/or screen to prevent escape of sparks and/or burning embers.
5. The unit is to be placed on a non-combustible base that extends a minimum of 18 inches beyond the unit.
6. The unit should be located a minimum of 3 meters (10 feet) from the nearest combustible materials.
7. Only wood is to be burned in the unit.
8. Have a fire extinguisher and/or garden hose accessible at all times while operating the unit.
9. Ensure the fire is completely extinguished before leaving it.
10. Check with local Fire Dept. and/or Dept. of Forestry and Agrifoods to ensure outdoor burning is permitted.
